

TECHNICAL DATA

CONCEPT :

The Toyo DP15 to DP75 submersible pumps with agitator has been specially designed to handle extra heavy and abrasive slurries.

These centrifugal pumps, with closed impeller, feature a unique agitator design. The agitator lifts sediments into suspension and creates a homogeneous mixture. This enables the continuous pumping of media with a high concentration of solids.

Robust construction, careful selection of materials and unique contour components, coupled with a low speed high torque motor, have produced a pump with excellent abrasion resistance as well as a sufficient weight and an important torque. These characteristics ensure long service life and economical operation.

The impeller, the wear plates and the agitator are manufactured in cast chrome iron (24 to 28% Cr).

A strong short shaft, supported by a series of carefully selected bearings and an assembly of special lip seals operating in an oil bath ensure tightness in the hardest of conditions.

DP15 to DP75 are also available with double mechanical seals.

Servicing and maintaining the pumps to keep them in good working order is easy. On the pumps DP15 to DP75, you have two wear plates, one of which is adjustable allowing simple adjustments to maintain long lasting high performance.

The electric class F motor is cooled by the liquid in which the pump is submerged.

DP15 to DP75 can be equipped with thermal protection and moisture sensor. These pumps are also available in different metallurgies and notably in stainless steel for acid slurries pumping.

These pumps can be provided with detachable bend and base.

OPERATING CONDITIONS :

- with solid content of up to 60% by weight
- particle sizes up to 60 mm
- liquid temperatures up to 60°C
- pH levels between 4 and 14

Special versions are available for liquid temperatures up to 80°C. Maximal standard operating depth is 30 m and 120 m for high depth vesions.

ELECTRIC POWER REQUIREMENTS* :

Model	Power kVA	Amp. 400 V
DP 15/B	30	24
DP 20/B	40	32
DP 30/B	50	46
DP 40B	65	58
DP 50/B/BL/H	80	69
DP 60B	100	90
DP 75	120	116
DP 75B	120	116

*These figures are given as an indication.

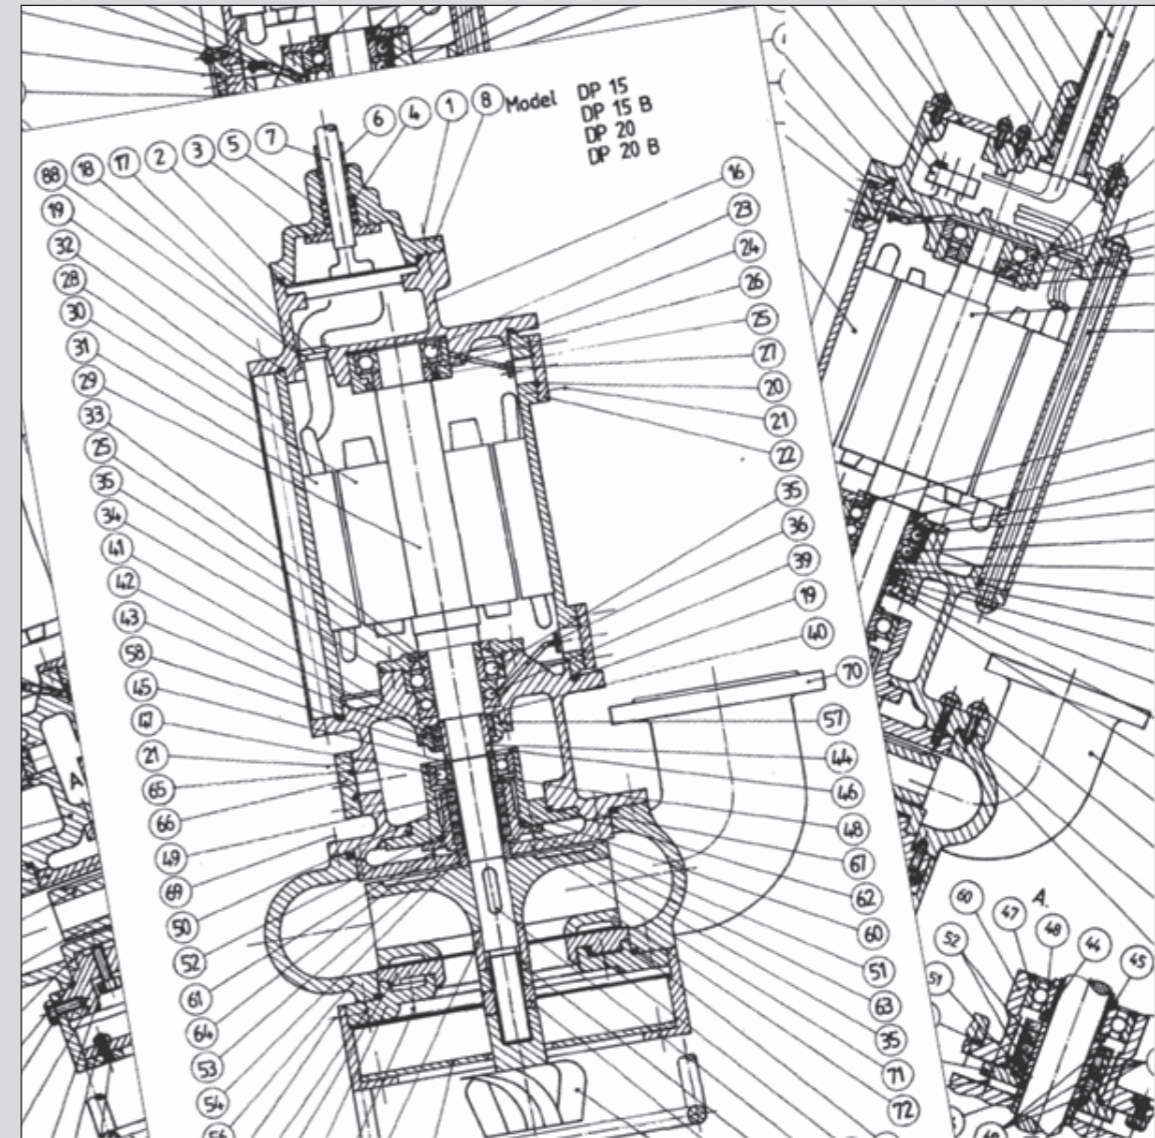

ELECTRIC CABLE :

The standard cable type to be used for connecting the pump is HO7RN-F and its specifications should correspond to the following:

Model	Section	Outer diam. mm	Max. length m / 400V
DP 15/B	4 x 10 mm ²	23	170
DP 20/B	4 x 10 mm ²	23	120
DP 30/B	4 x 16 mm ²	27	140
DP 40B	4 x 35 mm ²	37	260
DP 50/B/BL/H	4 x 35 mm ²	37	200
DP 60B	4 x 35 mm ²	37	170
DP 75	4 x 50 mm ²	43	180
DP 75B	4 x 50 mm ²	43	180

CONTROL PANEL :

We recommend the use of a Toyo statoric starter to start DP15- DP75 pumps.
